## UNIVERSAL

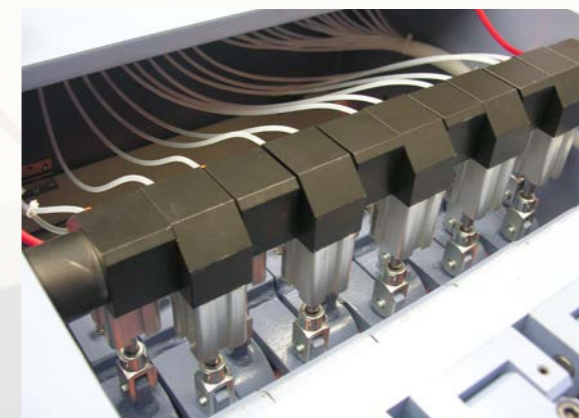

The 4-side planer type Universal is used for processing of lamellar elements as well as the big sizes beams. Its special structure allows to work at high speed up to 100mt/1' with high accuracy. The machine is equipped with a jointer system to get a high quality finish.

The working tables as well as the feeding rollers are hardened, chromed and ground. Driving system with automatic lubrication by means of cardanic joints. The independent pneumatic pressure are automatically lubricated. Lifting system on four hardened, chromed and ground columns Ø 110mm. equipped with automatic and lubricated angular transmissions.

### Technical data

	Max section	Feeding speed	Tools motors
<b>UNIVERSAL 300</b>	300x300	3-30/ 6-60/ 10-100	15-30 kw.
<b>UNIVERSAL 500</b>	300x500	3-30	15-30 kw.
<b>UNIVERSAL 700</b>	300x700	3-30	40 kw.
<b>UNIVERSAL 1000</b>	300x1000	3-30	50 kw.
<b>UNIVERSAL 1500</b>	300x1500	3-30	50 kw.

*Inox steel working tables*

*Pneumatic top pressers with independent lubrication*

*Hardened, chromed and ground feed rollers*
